Greetings & Salutations!

Did you know - April is Humor Month?

Me either! While surfing the world wide web one day, I came across this website - [www.123helpme.com](http://www.123helpme.com) - and found an interesting article on the importance of humor.

"Humor is the tendency to look at things from the mirthful or incongruous side. It is the quality that makes something laughable or amusing. Humor is the ability to perceive, enjoy, or express what is amusing or comical. It is the source of laughter and the catalyst of smiles. Humor is the spark that lights our eyes as well as the cause of tears that never grows old. **HUMOR** is a state of mind!

Most of us have a tendency to regard a clever sense of humor as the distinction of a person who is good hearted and friendly, someone people feel at ease with. They are the "life of the party" we always invite and the co-worker who always has a joke. Everyone has the jocular family member that they always look forward to seeing. We remember the kid in school that always made the class break into laughter. Humor is never forgotten when we reminisce and it is just as amusing as it was the first time.

Those who use humor to its best advantage teach others by example. Instead of getting angry when something goes wrong, we should try to look for the humor in the situation. It eases tensions and keeps things in perspective. Humor can energize us when a task has become tedious. Humor can make even the worst of situations tolerable!

Humor has been a source of entertainment throughout history. Humor has brought fame and fortune to those who have mastered its power. Humor is the universal language. Although it is true that different people find humor in different things, we all like to laugh.
